Subject: Communication question

Because of all the reorg and changes in where actions take place, I have a question or so to make sure we are getting everything covered. This is about a site in New Orleans; Lowerline. Its radiation in the middle of the street, probably 70 years old, residential neighborhood, EJ community, the community has history with EPA with two other close by NPL sites, Xavier University is 2 blocks away, etc. We need to proceed quickly to remove the radiation from the street. We are targeting the Week of May 28th to start the mobilization.

Janetta has been coordinating with the City of New Orleans, the State – both LDEQ and Health and Hospitals/ATSDR, and the PIO from HQ via our own George Brozowski. Fact sheets, Q&As, repository, are all being worked on. Janetta is working on the contact with the elected officials including the Rep.

I want to make sure its all going according to the new procedures and there isn't going to be any surprises. The CR/PA aspect is critical on this one. We will be closing the street, providing an alternate entrance to one resident, and disrupting the flow of foot and vehicle traffic. And sure don't want to just appear and scare the gumbo out of anyone.

So, how we doing?
